-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 9, 12-17, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Pappas (6,074,425).

With respect to claims 1, and 13, Pappas discloses a knee prosthesis comprising a tibial component (300) defining a lateral and medial concavities (303,304) the lateral concavity having a first portion (311) configured to interact with the lateral condyle of the femur during normal knee flexion and a second portion (312) configured to interact with the lateral condyle of the femur during high knee flexion; and the medial concavity having a first portion (313) configured to interact with the medial condyle of the femur during normal knee flexion and the second portion (314) configured to interact with the medial condyle of the femur during high knee flexion; wherein the lateral and medial concavities have different shapes; as seen in FIG.17, and wherein the first and second portions are at least partially at separate locations within their respective concavities; as set forth in column 9, lines 24-67, column 10, lines 1-35.

With respect to claims 2-6, 9, 12, 14-17, 20, 23, Pappas discloses all the limitations, as set forth in column 9, lines 24-67, column 10, lines 1-34; and as best seen in FIGS.17-18.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10,11,21,22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pappas (6,074,425).

With respect to the above claims, it is noted that Pappas did not teach of a boundary conformity between 3 to 5 mm; as claimed by applicant. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to reach this optimum value, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Allowable Subject Matter

Claims 10,11,18,19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
